To His Honour the Lieutenant-Governor of the Province of Ontario

May It Please Your Honour:

I herewith beg to present for your consideration the Seventy-eighth Annual Report of the Registrar-General, relating to the Registration of Births, Marriages and Deaths in the Province of Ontario during the year 1947.

Respectfully submitted,

G. H. DUNBAR,
Registrar-General of Ontario.

SIR:

I have the honour to submit for your approval the Seventy-eighth Annual Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1947.

I have the honour to be, Sir,

Your obedient servant,

R. B. WALLACE,
Deputy Registrar-General.

TO THE HON. G. H. DUNBAR,
Registrar-General of Ontario.

TABLE OF CONTENTS

	Page
Introduction	11

PART I.—COMPARATIVE AND ANALYTICAL SUMMARY

Population	12
Natural Increase	13
Births	13
Infant Mortality	21
Maternal Mortality	25
General Mortality	28
Selected Causes of Death	29
The Four Chief Causes of Death in Each Age-Group	32
Mortality from Notifiable Diseases	33
Mortality from Tuberculosis	37
Mortality from Cancer	39
Mortality from Pneumonia, Bronchitis and Influenza	43
Special Classes of Accidental Deaths	43
Marriages	45
Divorces	45

List of Charts

*Detailed information regarding the above cities on file in the Registrar-General's Branch will be furnished upon receipt of a written request.

INTRODUCTION

This report is divided into two parts. Part I consists of an analytical survey of the Vital Statistics of the province in the form of narrative summaries, summary tables and charts. Its objectives are (1) to indicate (in so far as can be portrayed by vital statistics) the general trend over the past several years, in the general state of the health of the people of Ontario; (2) to assess the vital statistics of 1947 in the light of these general trends; and (3) to bring to light certain specific problems in the field of public health, such as infant and maternal mortality and deaths from specific diseases such as cancer and tuberculosis and those resulting from accidental causes. Part II consists of detailed tables covering vital statistics for the year 1947. In the interests of economy several tables are not printed in this report. These are listed in the Table of Contents and the information is available upon request providing that such requests, in the opinion of the Registrar-General, are sufficiently warranted and urgent in the public interest.

PART I.—COMPARATIVE AND ANALYTICAL SUMMARY

Population

For reference purposes the estimated population of the province over a period of about two decades is shown by sex in Table A, while a distribution by sex and age-groups of the estimated population of 1947 is provided in Table B.

TABLE A—POPULATION, CENSUSES 1921, 1931 AND 1941 AND ESTIMATED FOR INTERCENSAL YEARS, BY SEX, ONTARIO

Year	Total	Male	Female	Year	Total	Male	Female
1921	**2,933,662**	1,481,890	1,451,772	1934	**3,544,000**	1,804,000	1,740,000
1922	**2,980,000**	1,507,000	1,473,000	1935	**3,575,000**	1,820,000	1,755,000
1923	**3,013,000**	1,525,000	1,488,000	1936	**3,606,000**	1,835,000	1,771,000
1924	**3,059,000**	1,550,000	1,509,000	1937	**3,637,000**	1,850,000	1,787,000
1925	**3,111,000**	1,578,000	1,533,000	1938	**3,672,000**	1,867,000	1,805,000
1926	**3,164,000**	1,606,000	1,558,000	1939	**3,708,000**	1,885,000	1,823,000
1927	**3,219,000**	1,635,000	1,584,000	1940	**3,747,000**	1,904,000	1,843,000
1928	**3,278,000**	1,666,000	1,612,000	1941	**3,787,655**	1,921,201	1,866,454
1929	**3,334,000**	1,696,000	1,638,000	1942	**3,884,000**	1,966,000	1,918,000
1930	**3,386,000**	1,724,000	1,662,000	1943	**3,917,000**	1,983,000	1,934,000
1931	**3,431,683**	1,748,844	1,682,839	1944	**3,965,000**	2,005,600	1,959,400
1932	**3,473,000**	1,769,000	1,704,000	1945	**4,004,000**	2,016,600	1,987,400
1933	**3,512,000**	1,788,000	1,724,000	1946	**4,101,000**	2,068,300	2,032,700
				1947	**4,189,000**	2,113,000	2,076,000

The estimated populations for 1932 to 1940 and 1942 have been revised and the necessary adjustments have been made in the tables showing rates.

TABLE B—ESTIMATED POPULATION OF ONTARIO, BY SEX AND AGE-GROUP, 1947

Age-Group	Total	Male	Female	Age-Group	Total	Male	Female
Under 5	399,100	204,400	194,700	50-54	230,900	117,800	113,100
5- 9	329,100	167,900	161,200	55-59	207,000	105,200	101,800
10-14	316,300	160,400	155,900	**45-59**	**691,800**	**353,200**	**338,600**
0-14	**1,044,500**	**532,700**	**511,800**				
				60-64	172,800	87,700	85,100
15-19	327,900	165,500	162,400	65-69	135,900	67,300	68,600
20-24	351,300	175,200	176,100	70-74	99,200	47,900	51,300
25-29	342,700	171,000	171,700	**60-74**	**407,900**	**202,900**	**205,000**
15-29	**1,021,900**	**511,700**	**510,200**				
				75-79	64,400	30,200	34,200
30-34	326,600	163,900	162,700	80-84	35,200	15,800	19,400
35-39	301,300	152,900	148,400	85-89	15,000	6,600	8,400
40-44	274,900	140,800	134,100	**75-89**	**114,600**	**52,600**	**62,000**
30-34	**902,800**	**457,600**	**445,200**				
				90 and over	**5,500**	**2,300**	**3,200**
45-49	253,900	130,200	123,700				
				Total	**4,189,000**	**2,113,000**	**2,076,000**

Figures supplied by Social Analysis Branch, Dominion Bureau of Statistics.

*These estimates do not take into account interprovincial migration, figures for which are not available for intercensal years.

The rural and urban distribution of the 1947 estimated population was as follows:—

Population Group	Estimated Population	Per cent
Incorporated centres *10,000 population and over	1,881,593	45.0
Incorporated centres *5,000 to 10,000 population	239,127	5.7
Incorporated centres *1,000 to 5,000 population	334,675	8.0
Rural Population (including incorporated centres under 1,000*)	1,733,605	41.3

*As at Census of 1941.

Births and deaths for the year 1947 are classified by place of residence, marriages being classified by place of occurrence.

Tables 7, 8, 23 and 30 have totals by place of occurrence and place of residence.

Natural Increase

The natural increase in the population and the computed rates for the period 1922 to 1946 are shown in Table C.

TABLE C—NATURAL INCREASE AND NATURAL INCREASE RATES, ONTARIO, 1922-1947

Year	Live Births	Deaths	Excess of Births over Deaths	Natural Increase Rate per 1,000 Population
1922	71,430	34,034	37,396	12.6
1923	70,056	35,636	34,420	11.5
1924	71,510	33,078	38,432	12.6
1925	70,122	33,960	36,162	11.6
1926	67,617	35,909	31,708	10.1
1927	67,671	34,775	32,896	10.2
1928	68,510	37,128	31,382	9.6
1929	68,458	38,123	30,335	9.1
1930	71,263	37,313	33,950	10.0
1931	69,209	35,705	33,504	9.8
1932	66,842	36,469	30,373	8.7
1933	63,646	35,301	28,345	8.0
1934	62,234	35,119	27,115	7.7
1935	63,069	36,317	26,752	7.4
1936	62,451	37,571	24,880	6.9
1937	61,645	38,475	23,170	6.3
1938	65,564	36,890	28,674	7.9
1939	64,123	37,530	26,593	7.2
1940	68,524	38,503	30,021	8.0
1941	72,262	39,226	33,036	8.7
1942	78,192	39,119	39,073	10.0
1943	81,173	41,063	40,110	10.2
1944	78,090	39,781	38,309	9.7
1945	78,974	39,499	39,475	9.8
1946	97,446	39,758	57,688	14.1
1947	108,853	41,619	67,234	16.0

The natural increase rate has shown a general downward trend during the past two decades with a considerable recovery taking place since 1939. This is attributable, to a large extent, to a sudden rise in the birth rate associated with the war, although the rate in 1944 and 1945 showed a slight decrease. The lowest rates were reached in the immediate post-depression period of 1933 to 1939, as is clearly shown in Chart 1. The main factors throughout were naturally a general falling birth rate and a relatively stable death rate for the total population despite an increase in the deaths among the higher ages which is directly associated with an ageing population.

Births

Table D presents an historical summary of births, stillbirths and illegitimate births, together with computed rates for each, while Chart 1 portrays the general trends over the same period.

TABLE D—SUMMARY OF LIVE BIRTHS, STILLBIRTHS AND ILLEGITIMATE BIRTHS, AND RATES, ONTARIO, 1922-1947

Year	Live Births		Stillbirths		Illegitimate Births	
	Number	Rate per 1,000 Population	Number	Rate per 1,000 Live Births	Number	Rate per 1,000 Live Births
1922	71,430	24.0	3,115	43.6	1,519	21.3
1923	70,056	23.3	3,028	43.5	1,579	22.5

The number of live births has shown a more or less general decrease from 1922 to approximately 1937 when 61,645 births were registered. There was some recovery up to the war period followed by a decided increase accompanying the war. The crude birth rate of 20.7 in 1943 was 20 per cent higher than in 1939, and was as high as that attained in 1929, a prosperity period. There was a definite increase in 1947 when the rate was 26.0.

The stillbirth rate, on the other hand, has been on an extremely encouraging downward trend with a reduction of over 54 per cent since 1922. In 1922 for every 1,000 babies born alive, 43 were stillborn, while in 1947 there were 20 stillborn—a fact which may be taken as a partial reflection of the improved health of mothers in the province and the improvement in obstetrical services.

Illegitimacy, however, has been increasing at an alarming rate—4,748 illegitimate births being registered in 1947 as compared with 1,519 such births in 1922. The rate has more than doubled since 1922 with over 43 of every 1,000 births in 1947 being illegitimate as compared with 21 in 1922 and 40 in 1931. It will be noted, however, that in the period 1922-1931 the rate rose 88 per cent as compared with a rise of only 3 per cent since that period.

Tables E, F and G provide a breakdown of births by age of mothers for the same three groups, and indicate to some degree the extent to which age has contributed to the trends outlined above, while Chart 2 provides an interesting picture of the age distribution over the same period on the basis of five-year averages.

NOTE:—Births to mothers of "not stated" ages have been distributed on the basis of specified ages.

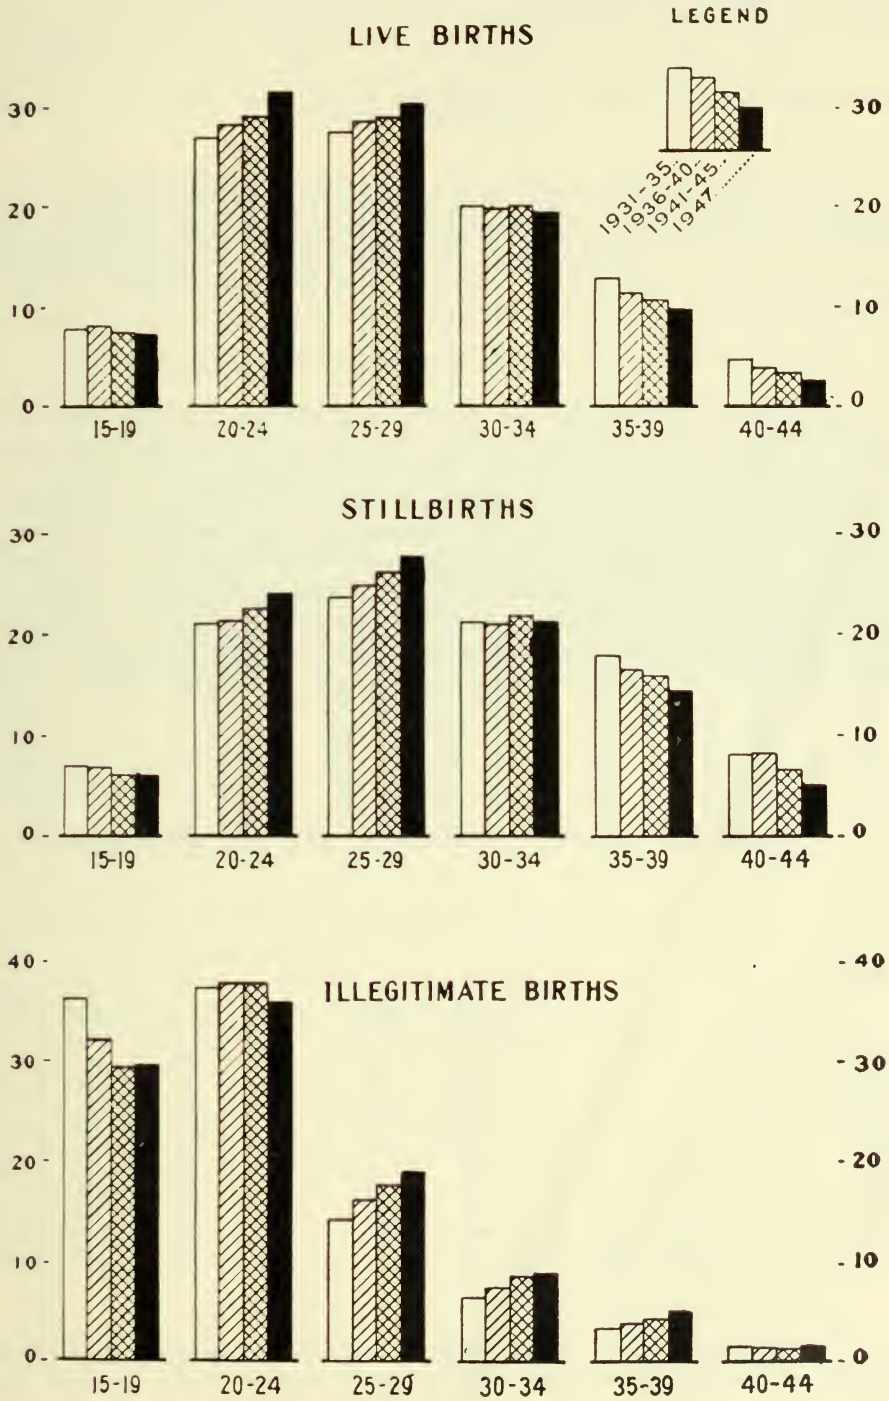
Chart 2

PERCENTAGE OF

LIVE BIRTHS, STILLBIRTHS AND ILLEGITIMATE BIRTHS

IN EACH AGE-GROUP OF MOTHERS

ONTARIO



There has been a general tendency during the past two decades towards younger motherhood. For example, of every 100 babies born alive in 1922, 6 were to mothers under 20 years of age, over 24 to mothers 20-24, and 28 to mothers 25-29 or a total of 58 children to mothers under 30 years of age. In 1946 of every 100 live births, 7 were born to mothers under 20, 30 to mothers 20-24, and 29 to mothers 25-29 or a total of 66 children to mothers under 30 years of age. The picture, however, is not complete without mentioning the fact that fewer children are now being born to each mother than was the case two decades ago, and these are being borne in the early years of married life.

As a partial effect of the trend towards younger motherhood, a greater percentage of stillbirths is now occurring at the younger ages than was the case in 1922. In 1947, 30 per cent were to mothers below 25 years of age as compared with 25.7 per cent in 1922. In 1947 of every 100 stillbirths, 42 were to mothers over 30 years of age as compared with 50 in 1922 and 47 in 1931.

There are indications that the number of stillbirths per 1,000 deliveries has been decreasing at an encouraging rate over the past two decades, and that this has been evident for each age-group of mothers, although the fact remains that the risk of stillbirth delivery increases with age. The following summary sufficiently indicates the general trend in this respect over the 20-year period. For example, of every 1,000 deliveries among mothers 15-19 in 1947, 16 were stillborn as compared with 29 in the period 1922-27; among mothers 20-24 years of age, 15 as compared with 30; among mothers 25-29 years of age, 18 as compared with 33, with similar encouraging figures for older mothers, although the risk of stillbirth delivery increases rapidly for mothers over 35 years of age.

AVERAGE NUMBER OF STILLBIRTHS PER 1,000 DELIVERIES

Years	Age of Mother					
	15-19	20-24	25-29	30-34	35-39	40 and over
1922-27	29	30	33	39	49	64
1928-32	27	27	30	37	48	63
1933-37	27	25	28	34	45	64
1938-42	24	21	25	31	43	58
1942	22	19	23	29	41	57
1943	20	18	24	27	36	53
1944	17	19	20	26	34	47
1945	17	19	19	24	34	51
1946	18	15	18	22	29	47
1947	16	15	18	22	30	37

With respect to illegitimacy, Table G and Chart 2 indicate that the great majority of the illegitimate live births occur to mothers under 25 years of age.

Of every 100 such births in 1922, 74 were to this group of mothers, as compared with 65 in 1947.

In recent years a greater proportion of illegitimate births have been born to mothers in the older age-groups. Chart 2 illustrates this fact showing higher percentages for mothers in their 30's with proportionate reductions for mothers in the 'teen ages.

Infant Mortality

Table H and Chart 3 both show very clearly the declining trend in the number of deaths of children under one year of age. This decline in trend indicates, to a large extent, the success of a long range programme directed, during the last two decades, at the reduction of infant mortality.

TABLE H—INFANT DEATHS, BY AGE AT DEATH, ONTARIO, 1931-1947

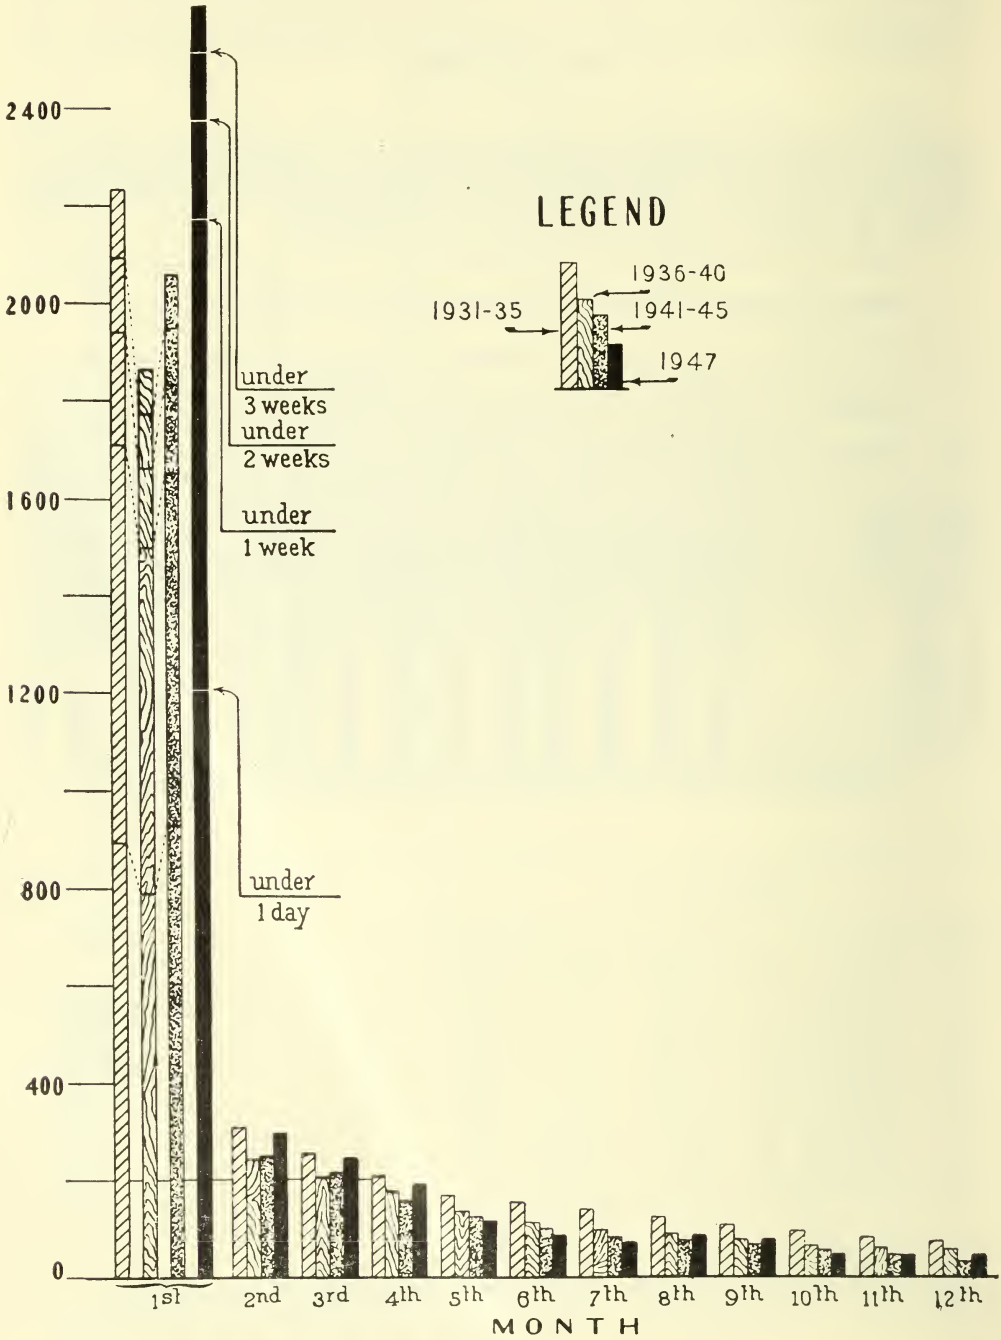
Chart 3

INFANT MORTALITY

ONTARIO

DEATHS AT EACH AGE PERIOD

Five-year Averages 1931-1945
and for the year 1947



There was a reduction in the total number of infant deaths from 3,961 in the period 1931 to 1935 to 3,275 in the period 1941 to 1945. This reduction is apparent in every monthly age-group. The increases which are noted from 1941 to 1946 must be considered in comparison with the extensive increase in the number of births during the same years. The following summary indicating the number of infant deaths per 1,000 live births presents a picture of the rapid reduction in infant mortality:

Years	Infant Deaths per 1,000 Live Births
1926-30	74
1931-35	61
1936-40	50
1941-45	42
1946	37
1947	36

The rate of 36 per 1,000 live births in 1947 was the lowest ever recorded. Table 1 which presents the deaths and rates for certain causes brings out the fact that there has been a notable reduction in deaths attributable to whooping cough except for 1947 when there was a marked increase. Influenza has fluctuated over the period showing the effect of minor epidemics. In 1947 there was an increase in the deaths from diseases of the respiratory organs, and there has been no apparent improvement in the death rate from malformations.

TABLE I—DEATHS OF CHILDREN UNDER ONE YEAR (STATED CAUSES OF DEATH), ONTARIO 1938-1947

Cause of Death	Total Deaths										10-yr. Average 1938-1947

Maternal Mortality

From Table K, it will be noted that a considerable reduction in the number of deaths of mothers during childbirth has taken place during the past 20 years, and particularly during the past 5 years, with the 1947 rate being considerably below the average of the last decade. In general, the reduction in the rate seems to be more apparent in younger than in older mothers, although in 1942, and 1947, the latter group showed a marked decrease in the rate per 1,000 live births.

* Rates not computed because of small numbers.

The tables which follow present the distribution of maternal deaths during 1947 by locality, as well as deaths of women not directly classified as due to pregnancy or child-birth, but which were associated therewith.

The rates shown in Table L are of special interest in that they indicate clearly the general downward trend in maternal mortality in cities, towns and rural areas of the province. The rates for 1947 being 1.2 per 1,000 live births in cities, 0.5 in towns and 1.3 in the rural areas.

General Mortality

Table N presents a historical summary of deaths by sex in the province and the computed crude death rates over a 25-year period while Chart 1 presents a graphic picture of the general trend in the rate.

Over the past two decades three main trends are apparent. From 1922 to 1930 the rate averaged close to 11 deaths per 1,000 population, dropping rapidly in 1931 and 1932, establishing a rate at about 10 deaths per year per 1,000 population, dropping to 9 per 1,000 of population for the years 1945, 1946 and 1947.

The death rate among males has been consistently higher than that among females and there are indications that this divergence between the two rates has been widening during the past decade or more.

TABLE N—DEATHS (EXCLUSIVE OF STILLBIRTHS) AND DEATH RATES PER 1,000 POPULATION, ONTARIO, 1922-1947

Year	Deaths			Rate per 1,000 Population

1947	**41,619**	22,891	18,728	**9.9**	10.8	9.0

Table O presents both male and female crude death rates for each 5-year age-group, based on the population as enumerated at the censuses of 1941 and as estimated for the years 1942, 1943, 1944, 1945, 1946 and 1947. There are several features with respect to changing death rates which are worthy of comment. Notable among which is the remarkable decrease in the death rate of children under 5 years of age from 14.8 in 1941 to 12.4 in 1947 for males and from 11.3 in 1941 to 9.9 in 1947 for females. Similar declines are apparent in other age-groups up to middle life.

This latter fact is clearly portrayed in Chart 4 which depicts the percentage of deaths occurring in each age-group of the population.

TABLE O—DEATH RATES PER 1,000 POPULATION FOR EACH SEX AND AGE GROUP, 1931, 1941, 1942, 1943, 1944, 1945, 1946 and 1947

Causes of Death

The deaths shown in Table P are for selected causes or groups of causes to which, during the past 10-year period, more than 75 per cent of total deaths have been recorded. A large part of the increase in 1941 in diseases of the heart and intracranial lesions of vascular origin and the decrease in diseases of the arteries is due to changes in classification in the "Fifth Revision of the International List of Causes of Death." The increase in diabetes in 1941 is partly due to a change in preference when two causes are mentioned on a death certificate.

(1) Per cent of total deaths.
(2) Rate per 100,000 population.

NOTE: It should be noted that the effects of certain changes in classification and rearrangement of titles provided in the Fifth Revision of the International List of Causes of Death are apparent in the following: Tuberculosis, Diseases of the heart, Diseases peculiar to the first year of life, Diseases of the arteries and intracranial lesions of vascular origin.

The Four Chief Causes of Death in Each Age-Group

Table Q shows the four primary causes of death in each age group for 1947. It will be seen that violent or accidental deaths hold first place in every age group from 1 to 39 years of age. From 5 to 29 years of age tuberculosis is the second chief cause of death and fourth in the 30 to 39 year group. Pneumonia, bronchitis and influenza, taken as a group, are important in the younger age groups. Cancer does not appear as a main cause of death until the late 30's, the number of deaths increasing in each older age group. In general, diseases of the heart and arteries, cancer and intracranial lesions of vascular origin are the primary causes of death of persons over 50 years of age.

TABLE Q—THE FOUR CHIEF CAUSES OF DEATH IN THE DIFFERENT AGE-GROUPS, ONTARIO, 1947

Int. List Number	Age-group and Cause of Death	Deaths in Age-groups by Cause of Death	Per Cent of Deaths in Age-groups due to Specified Causes	Deaths from Specified Causes at all Ages	Per Cent of Deaths at all Ages from Specified Causes

Mortality from Notifiable Diseases

A summary of deaths and death rates from notifiable diseases is shown in Table R (1) and R (2) for the last 10 year period. In general, from 1938 diphtheria, erysipelas, scarlet fever, typhoid fever have been on a general downward trend, but in 1945, 1946 and 1947 there was an increase in diphtheria. Deaths from influenza have shown a decided decline except for the years 1939 and 1943. Deaths from poliomyelitis have shown the same trend except for the years 1938, 1946 and 1947, as well as those from whooping cough except for the year 1941. Deaths from tuberculosis are discussed in detail in the section to follow.

TABLE R (1)—DEATHS FROM NOTIFIABLE DISEASES, ONTARIO, 1938-1947.

Mortality from Tuberculosis

Table S (1) shows the deaths from all forms of tuberculosis in the province from 1938 to 1947. Table S (2) shows the death rates per 100,000 population classified by the age of the decedents for 1943, 1944, 1945, 1946 and 1947. There have been two main trends in the total number of those dying from tuberculosis; namely, a gradual decline from 1,237 deaths in 1938 to 1,093 in 1942, followed by a levelling off during the past five years, with an average of 1,056 deaths per year. On the other hand, the death rate shows a steady decline from 33.7 per 100,000 in 1938 to 28.1 in 1943 and 26.9 in 1944 and 25.3 in 1945 and 25.7 in 1946 and 24.8 in 1947. Chart 5 illustrates the decided reduction in mortality from tuberculosis which has taken place since the beginning of the century.

The largest number of deaths occurred in 1947 in the age-groups 20 to 29 years, and 30 to 39 years, followed by the 50 to 59 year group. Since 1938 there has been a decline in the number of deaths in the younger age-groups, whereas, in the older age-groups there has not been much change in this period. The rates, however, in all instances, have been steadily declining. Although the number of deaths of children under four years of age has always been relatively small, since 1941 there has been a remarkable reduction in the death rate among this group of the population.

Table Z in Part 1 of this report gives details of deaths and death rates for counties according to place of occurrence and place of residence for the year 1947.

Mortality from Cancer

Chart 5 illustrates the steady upward trend in the mortality rate from cancer since the beginning of the century. The increase in the total number of deaths since 1938 is shown in Table T (1) and is apparent in most of the age-groups particularly among older persons. In addition the general cancer death rate has increased over the past decade, standing at 136.8 deaths per 100,000 population in 1947, as compared with 130.2 in 1941 and 121.8 in 1938. Table T (2) shows the rate from 1938 to 1947 by sex and indicates that the female rate is higher than the male rate, but the death rate for males has increased more rapidly than that for females.

1943	132.6	127.4	137.9
1944	132.1	126.5	137.8
1945	132.2	125.6	138.9
1946	132.0	127.7	136.4
1947	136.8	134.3	139.4

The number of deaths from cancer classified by sites affected is given in Table U for the period 1938 to 1947. Cancer of the digestive organs and peritoneum accounts for almost half of the deaths from this disease, with an increase of 15.3 per cent in the number of deaths occurring in this group since 1938. The number of deaths from cancer of the male and female genital and urinary organs has increased 34.2 per cent since 1938, cancer of the breast 23.1 per cent, while cancer of the respiratory organs has more than doubled during the same period.

NOTE: Cancer of male genital organs and of urinary organs was not tabulated separately for the years 1938 to 1940.

Mortality from Pneumonia, Bronchitis and Influenza

In Chart 5 is a curve showing the trend in the death rate from pneumonia, a disease which may be affected by epidemics as illustrated by the peaks of 1907, 1916 and 1918. During the twenty years from 1925 to 1945 the death rate from this disease showed a general downward trend. The decrease was more noticeable after the introduction of the sulpha drugs for the treatment of respiratory diseases. The rate was 79.5 per 100,000 in 1924, 44.2 in 1941 and 49.2 in 1947.

Table U (1) shows the number of deaths from influenza, bronchitis and pneumonia and indicates the fluctuation in the number of deaths recorded as due to influenza.

TABLE U (1)—DEATHS FROM PNEUMONIA, BRONCHITIS AND INFLUENZA IN ONTARIO, 1938-1947

Int. List No.	Cause	1938	1939	1940	1941	1942	1943	1944	1945	1946	1947

Special Classes of Accidental Deaths

Table V shows of the 2,470 deaths in 1947 cross-classified as to nature of injury 923 were due to crushing, 880 to falls, 337 to drowning, 148 to burns, 74 to poisonous gas, 59 to mechanical suffocation, 18 cutting or piercing instruments, 31 electric currents. Of these injured by crushing 611 deaths were due to automobile accidents (excluding trains or street cars), 82 to railway accidents (excluding motor vehicles) and 5 to air transport accidents.

TABLE V—CLASSIFICATION OF ACCIDENTAL DEATHS ACCORDING TO THE NATURE OF INJURY

These accidental deaths are classified according to circumstances involving the accident under rubrics 169 to 176, 178, 180, 181, 182, 183, 185, 186, 187 and 193.

193	Accidents due to electric currents	29	2

Marriages

From Table W it will be noted that there have been significant fluctuations in the number of marriages in the province since 1925, each of which have reflected general economic trends. For example, there was a general increase in marriages and in the marriage rate leading up to 1929, a prosperity period, followed by a decline coincident with the depression period which continued until approximately 1933. This was followed by a return to a more stable economic condition which is reflected by an increase in both the total number of marriages and the marriage rates. The effect of the war is clearly apparent in the relatively high rates of 11.0, 11.4 and 11.7 per 1,000 population during the three years, 1940, 1941 and 1942. In 1943 the rate decreased to 9.2 followed by a further decrease to 7.9 in 1944, and an increase in 1945 to 8.5, with a further increase in 1946 to 11.2, and decreasing in 1947 to 10.5.

TABLE W—MARRIAGES AND MARRIAGE RATES PER 1,000 POPULATION, ONTARIO, 1925-1947

Year	Number	Rate per 1,000 Population	Year	Number	Rate per 1,000 Population
1925	23,074	7.4	1937	29,893	8.2
1926	23,632	7.5	1938	30,080	8.2
1927	24,677	7.7	1939	34,657	9.3
1928	25,728	7.8	1940	41,229	11.0
1929	27,605	8.3	1941	43,270	11.4
1930	25,605	7.6	1942	45,466	11.7
1931	23,771	6.9	1943	36,109	9.2
1932	22,224	6.4	1944	31,227	7.9
1933	22,587	6.4	1945	34,137	8.5
1934	25,874	7.3	1946	46,073	11.2
1935	26,843	7.5	1947	44,056	10.5
1936	27,734	7.7			

Divorces

In Ontario, divorced persons form a very small proportion of the population as compared with some of the other countries of the world. The following summary indicates the number and percentages of such persons in the population of the province as enumerated in the past three censuses.

	1921*	1931	1941
Divorced persons—Male	1,135	1,071	2,291
Female	1,369	1,015	2,865
Per cent of population—Male	0.08	0.06	0.12
Female	0.09	0.06	0.15

*Including legal separations.

An historical summary of the number of marriages dissolved in Ontario since 1919 is presented in Table X. Previous to 1920 very few divorces were granted in the province. There was no appreciable increase in the number till the late 1920's, but since the transfer in 1930 of jurisdiction from the Dominion Parliament to provincial courts there has been a steady annual increase (except in 1937) in the number of divorces. Previous to 1930 a record number of 213 (1928) divorces were granted. From an annual average of somewhat over 300 in the early 1930's the number has increased rapidly to 949 in 1941, 1,185 in 1942, 1,376 in 1943, 1,510 in 1944, 1,948 in 1945, 2,639 in 1946, and 3,509 in 1947.

In the early 1920's the majority of the successful applicants were husbands, but since that period dissolutions granted on the application of wives have been in the great majority. Since 1935 for every 1,000 divorces granted to wives, an average of 550 have been granted to husbands as applicants, the ratio in 1947 being 820 per 1,000 divorces granted to wives.

TABLE X—DISSOLUTIONS OF MARRIAGE (DIVORCES) AND RATE PER 100,000 POPULATION, 1919-1947, AND RATIO OF DISSOLUTIONS TO MALES AND FEMALES, 1935-1947

Year	Dissolutions of Marriage	Rate per 100,000 Population	Year	Dissolutions of Marriage	Rate per 100,000 Population	Year	Dissolutions of Marriage	Rate per 100,000 Population	Dissolutions Granted to—		Ratio of Dissolutions to Males per 1,000 Dissolutions to Females

Table 15—Multiple Births Classified to Show Number of Children Born Alive and Stillborn by Sex in Ontario, by Place of Residence of Mothers, 1947

Classification of Births		Number
Twin births		1,143
Two males (both living)		365
One male and one female (both living)		359
Two females (both living)		336
One male living and one male stillborn		26
One male living and one female stillborn		7
One male stillborn and one female living		8
One female living and one female stillborn		20
Two males (both stillborn)		6
One male and one female (both stillborn)		5
Two females (both stillborn)		11
Triplet births		10
Two males and one female (all living)		2
Three females (all living)		6
Two females living and one female stillborn		1
Two males living and one male stillborn		1
Total multiple births	No.	1,153
	M.	1,180
	F.	1,136
Total single live births	No.	106,644
	M.	54,588
	F.	52,056
Total single stillbirths	No.	2,069
	M.	1,064
	F.	1,005
Total confinements		109,866

MARRIAGES

TABLE 45—CAUSES OF DEATH FOR TOWNS AND VILLAGES OF 5,000 TO

CAUSES OF DEATH	Total	Barrie	Brampton	Cobourg	Collingwood	Dundas	Eastview	Fort Erie	Fort Frances	Hawkesbury	Ingersoll	Kenora
56D. Brain and other parts of the central nervous system	1								1			
56E. Other and unspecified organs	2											
57. Tumours of undetermined nature	3					1						
57D. Brain and other parts of the central nervous system	1					1						
57E. Other and unspecified organs	2											
CLASS III—RHEUMATISM, DISEASES OF NUTRITION AND OF THE ENDOCRINE GLANDS, OTHER GENERAL AND VITAMIN DEFICIENCY DISEASES												
Total	77	4	1	2	3	2		3			5	
58. Acute rheumatic fever	2											
58A. Acute rheumatic heart conditions	2											
59. Chronic rheumatism and other rheumatic diseases	1											
61. Diabetes mellitus	62	3		1	1	2		3			5	
63. Diseases of the thyroid and parathyroid glands	8	1		1	2							
63A. Simple goitre	1				1							
63B. Exophthalmic goitre	7	1		1	1							
64. Diseases of the thymus gland	2											
65. Diseases of the adrenal glands (Addison's disease)	2		1									
CLASS IV—DISEASES OF THE BLOOD AND BLODD-FORMING ORGANS												
Total	30	2			2		1	3	1	1	3	
72. Haemorrhagic conditions	4									1		
72A. Primary purpura	4									1		
73. Anaemias	13	1			1						3	
73A. Pernicious anaemia	8	1			1						1	
73B. Others under this title	5										2	
74. Leukaemias and aleukaemias	13	1			1		1	3	1			
74A. Leukaemias	13	1			1		1	3	1			
CLASS V—CHRONIC POISONING AND INTOXICATION												
Total	1											
77. Alcoholism	1											
77C. Others under this title	1											
CLASS VI—DISEASES OF THE NERVOUS SYSTEM AND SENSE ORGANS												
Total	290	16	16	8	5	13	3	2	12	2	6	6
80. Encephalitis (non-epidemic)	2											
80B. Others under this title	2											
81. Meningitis (non-meningococcal)	3											
81A. Simple meningitis	3											
82. Diseases of the medulla and spinal cord	7				1							
83. Intracranial lesions of vascular origin	257	16	15	8	4	13	3	2	12	2	5	6
83A. Cerebral haemorrhage or effusion	102	6	1	6	4	10	1	1	5	1	2	4
83B. Cerebral embolism and thrombosis	10	1							4			
83D. Hemiplegia and other paralysis of unspecified origin	6		1									1
83E. With mention of arteriosclerosis	139	9	13	2		3	2	1	3	1	3	1
84. Mental disorders and deficiency (general paralysis of the insane excepted)	3											
84A. Schizophrenia (dementia praecox)	1											
84B. Others under this title	2

TABLE 45—CAUSES OF DEATH FOR TOWNS AND VILLAGES OF 5,000 TO

CAUSES OF DEATH	Total	Barrie	Brampton	Cobourg	Collingwood	Dundas	Eastview	Fort Erie	Fort Francis	Hawkesbury	Ingersoll	Kenora
CLASS IX—DISEASES OF THE DIGESTIVE SYSTEM												
Total	101	5	3	6	5	2	2	3	5	3	1	3
115. Diseases of the buccal cavity and annexa, and of the pharynx and tonsils	2				1							
115c. Diseases of the pharynx and tonsils	2				1							
116. Diseases of the oesophagus	1											
117. Ulcer of the stomach or duodenum	19			1	2	1			2			
117a. Stomach	9			1	2	1			1			
117b. Duodenum	10								1			
118. Other diseases of the stomach	1											
119. Diarrhoea and enteritis (under 2 years of age)	18	1		1			1		1	2		
119a. Diarrhoea and enteritis	18	1		1			1		1	2		
120. Diarrhoea and enteritis (2 years of age and over)	3									1		
120a. Diarrhoea and enteritis	2											
120b. Ulceration of the intestines	1									1		
121. Appendicitis	5	1		1				1				
122. Hernia, intestinal obstruction	16	1						2	1			
122a. Hernia	12							1				
122b. Intestinal obstruction	4	1						1	1			
123. Other diseases of the intestines	3			1	1							1
124. Cirrhosis of the liver	14	1	2	1	1	1						1
124b. Without mention of alcoholism	14	1	2	1	1	1						1
125. Other diseases of the liver	1											
125b. Others under this title	1											
126. Biliary calculi	8	1							1			1
127. Other diseases of the gall-bladder and bile ducts	6						1				1	
128. Diseases of the pancreas	3		1	1								
129. Peritonitis without stated cause	1											
CLASS X—DISEASES OF THE URINARY AND GENITAL SYSTEMS												
Total	111	8	3	3	2	2	7	4	1	7	3	2
130. Acute nephritis	3	1								1		
131. Chronic nephritis	84	6	3	2	2	2	5	3	1	6	2	1
132. Nephritis unspecified (10 years and over)	5			1			1					1
133. Other diseases of the kidneys and ureters	3							1				
134. Calculi of the urinary passages	4						1					
135. Diseases of the urinary bladder	4	1										
137. Diseases of the prostrate	8										1	
CLASS XI—DISEASES OF PREGNANCY, CHILDBIRTH AND THE PUERPERAL STATE												
Total	4										1	
140. Abortion with mention of infection	1											
140b. Spontaneous, therapeutic or of unspecified origin with mention of other infection	1											
146. Haemorrhage of childbirth and the puerperium	1											
146c. Others under this title	1											
147. Infection during childbirth and the puerperium	1											
147d. Puerperal embolism and sudden death	1											
148. Puerperal toxaemias—following delivery	1										1	
148a. Puerperal eclampsia	1										1	
CLASS XII—DISEASES OF THE SKIN AND CELLULAR TISSUE												
Total	4				1							
151. Carbuncle and furuncle	1											
153. Other diseases of the skin and cellular tissue	3				1
